Education

B.E Computer Science and Engineering , Chennai Institute of Technology 2022-present
• CGPA: 8.7/10

Professional Experience

Java Full Stack Intern (AICTE): Mar 2025 – Apr 2025
• Focused on developing and integrating full stack web applications using Java, Spring Boot, and front-end technologies.
• Contributed to creating responsive UI components and backend APIs, improving system efficiency and maintainability.
• Implemented RESTful services and optimized database queries, leading to a significant improvement in application performance.

Full Stack Intern,OctaNet Aug 2024 - Sept 2024
• Designed dynamic web solutions using React.js, JavaScript, Node.js, and Express.js, improving user experience.
• Developed a responsive landing page, ensuring seamless accessibility across devices and increasing user engagement.
• Optimized front-end and back-end performance, enhancing page load speed and overall platform responsiveness.

Projects

Web Based Recruitment Platform *React.js, Node.js, Express.js, MongoDB, Cloudinary, Gemini API*
• Built an AI-based recruitment platform where recruiters can post jobs and receive intelligently ranked applicant resumes.
• Used cosine similarity and Gemini API to extract and compare skills, then ranked applicants based on job relevance.
• Displayed visual analytics of skill trends using Recharts and implemented secure authentication using JWT tokens.

Automatic Certificate Generator *React, Node.js, Express.js, MySQL*
• Built a college platform to manage competitions, generate certificates automatically, and send emails to participants.
• Reduced manual work by automating repetitive tasks, improving overall workflow efficiency for college administrators.
• Enabled dynamic certificate creation with customizable templates and fields, ensuring accuracy and saving time.

Hotel Management and Booking System *React, Spring Boot, MySQL, Stripe*
• Created a hotel management system with Stripe integration for secure payments and seamless online booking experience.
• Designed an intuitive admin dashboard to manage reservations, room availability, user data, and bookings efficiently.
• Streamlined the booking and payment process, reducing transaction failures and increasing customer satisfaction significantly.

Coding Proficiency

LeetCode – Rated 1700, solved 850 problems, ranked in the top 14% globally, demonstrating strong problem-solving skills and algorithmic thinking. Earned 365-day and 200-day streak badges for consistency, dedication, and perseverance.
Codechef: Rated 1600,Solved 250 problems, achieved 3-Star, showcasing proficiency in competitive programming and logical thinking skills. Awarded Contest Contender (Gold) and Problem Solver (Silver) badges for analytical excellence and consistency.
Codeforces : Rated 1100, solved 60 problems, highlighting analytical problem-solving skills in competitive programming.

Certifications

Introduction to core Java programming concepts-Coursera
Introduction to Modern C++- NPTEL, Ministry of Education
Complete Full Stack Web Development Bootcamp- Udemy
Blockchain and its Applications- NPTEL, Ministry of Education
SQL Fundamentals and database management - Coursera
Object-oriented programming principles - Great Learning
Use-React with Express to Build an Application - Coursera

Skills

Programming Languages: Java, JavaScript, C++, Typescript.
Frameworks: Node.js, Express.js, React.js, Spring Boot.
Tools: IntelliJ IDEA, GitHub, Docker, Postman.
Databases and Cloud: MySQL, MongoDB , AWS.
Design tool: Figma .

Achievements

• **Selected for TCS Codevita 2nd Coding Round** : Successfully cleared the first round, securing a spot in the 2nd round, demonstrating strong problem-solving and coding skills, with a rank of 966 .
• **Cracked GATE CSE** : Achieved a GATE CSE score of 41, demonstrating strong proficiency in Computer Science concepts.
